INDIA'S CONSUMPTION CLOCK · SHARE OF DAILY ORDERS BY HOUR

# The Quick-Commerce Clock: When India Adds to Cart

Staple buying starts before sunrise — then the day builds act by act: staples at 2 PM, self-care at 4, snacks at 6, drinks & tea past 8.

**Home staples** (Atta · Detergent · Dishwash · Hair care)   **Self-care** (Face wash · Moisturizers)   **Snacks & munchies** (Bhujia · Muesli & granola)   **Drinks & tea** (Soft drinks · Energy · Tea)

## 2 PM Home staples

Atta · Detergent · Dishwash · Hair care

The post-lunch staples run — and the only basket moving before sunrise.

## 4 PM Self-care

Face wash · Moisturizers

The pre-evening cleanse — the sharpest single spike of any basket.

## 6 PM Snacks & munchies

Bhujia · Muesli & granola

Evening munchies crest as the workday winds down.

## 8 PM Drinks & tea

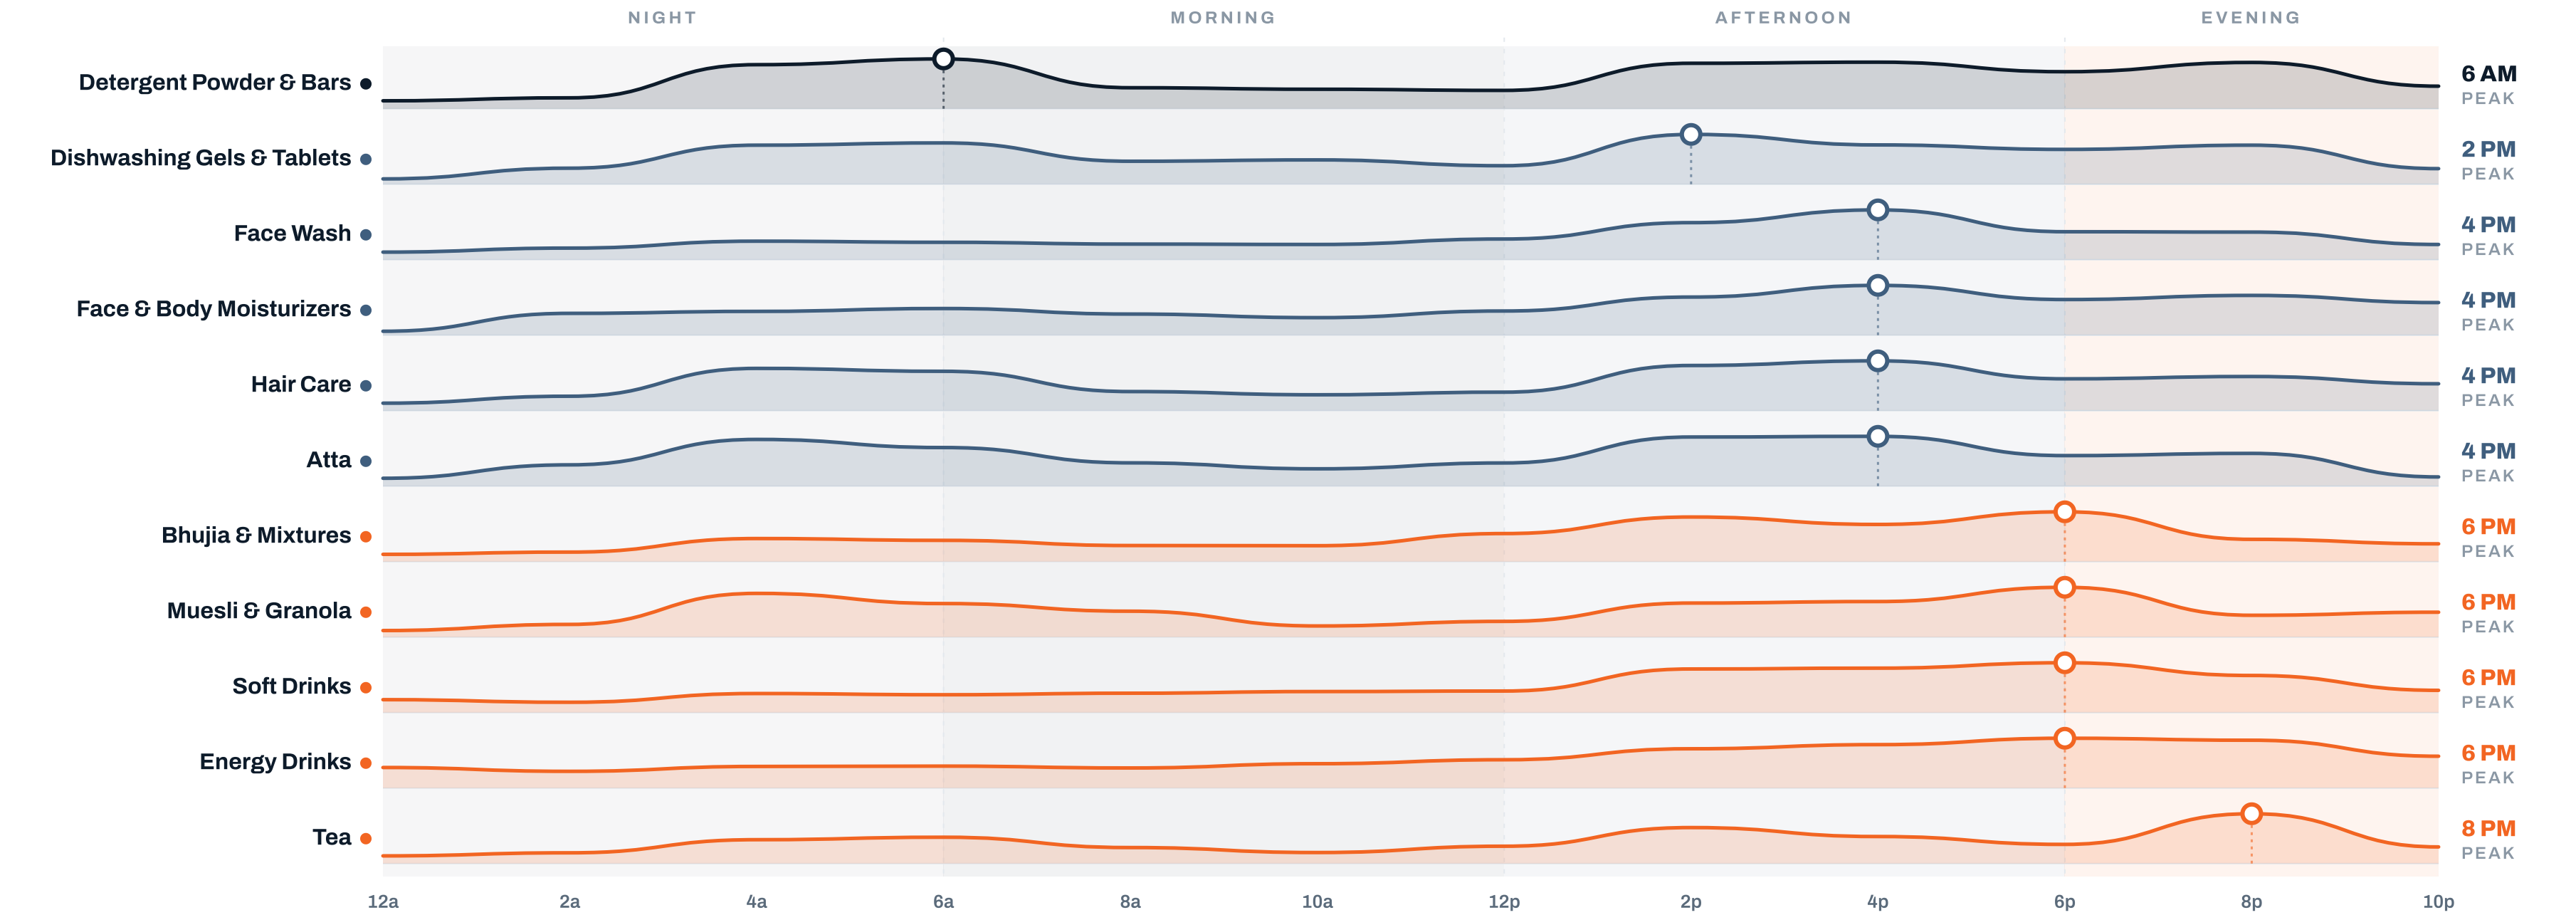

Soft drinks · Energy · Tea

Dinner-hour sippers — tea keeps climbing past 10 PM.

HIGHLIGHT OF THE MONTH · WHAT SELLS DURING WHICH HOUR

# The Quick-Commerce Clock: When Categories Peak

Each line is one category's share of orders across the day on India's largest quick-commerce platform, normalized to its own peak.

— Morning-led  
— Afternoon-led  
— Evening-led

### Evening is peak time

Energy & soft drinks, bhujia, muesli and tea all crest 6–8 PM — the high-intent evening window.

### The afternoon shelf

Face wash, moisturizers, hair care and atta cluster around a 4 PM peak as the day winds down.

### Mornings are for chores

Detergent leads the 6 AM staple run; dishwashing builds steadily toward a 2 PM midday peak.

# Methodology and Privacy

How we collect and analyse the data behind this report — and where to reach the team.

## About 1DigitalStack (1DS)

1DigitalStack (1DS) is an AI-driven ecommerce analytics and insighting firm that tracks 220+ e-marketplaces globally to estimate volume sales of SKUs across categories. 1DS has built proprietary algorithms that help it track all publicly available data — including visibility, pricing and pack-sizing — into meaningful analysis with a high level of accuracy. We estimate our outputs to be **~90% accurate**, and our data points are used by valued clients on an everyday basis for decision-making toward their goals and objectives.

## Research Methodology

- DATA COLLECTION
- Multiple pincodes across cities where quick commerce platforms are active.
- ANALYSIS
- 1DS proprietary analysis methodology.
